The Boss Book

by **Guga Ramone** » 28 Jun 2012, 16:39

After recommendations from the forumites I've bought the Boss Book. All I can say is WOW! It's very good, with lots of info, pictures and even a CD with samples. Living in Brazil, I had to import it. It wasn't cheap, but for sure was money well spent. It's a pitty that it only covers the pedals up to 2001, though. There should really be a version 2 of this book.

For those who still doesn't have it and love Boss pedals, BUY IT NOW!

It is a great book.... maybe part of the reason I became obsessed with Boss too..... sigh.... such a disease

can't wait for the new edition.... or to see what the new Klon will look like.....

Great as a quick reference to the pedals instead of surfing the net for the info

Still reading this book from time to time. Do you guys know who is hidden behind the guy who is showing his collection under the monicker mr. M? Yngwie Malmsteen maybe?

It's not Yngwie. It's a Japanese guitarist. It's easy to tell this by a few things: He says he worked construction as a teen in Osaka to buy a DD-2/3. There's a sticker pic of himself on a few of his pedals. Yngwie doesn't really use Boss peals. He has used and still uses things like the DOD 250

Pra mim saiu por R$ 55, mas foi em Maio de 2012, com o dólar a R$ 1,93. Creio que vc só vá conseguir comprá-lo usado, pois está esgotado.

In respect to other forum members, the reply in English:

I got my boss book a few months ago, very nice read! I think my favorite part is the distortion waveform diagrams, especially after having read about the underlying philosophy and goals behind their overdrive/distortion designs.

But yes it is a very GAS inducing read.

The enclosed CD didn't cause as much GAS as the book itself for me, except for the demo recording of the XT-2. Before I heard this one I thought that BOSS dirt pedals suck in general, because I only knew the DS-1, the SD-1 and the ODB-3 till then. But the XT-2 demo blew me away and I thought: "This is the tone I want!" Now I have more BOSS dirt pedals than I ever thought I would regularly use.

Congrats, great score! It'll always be an excellent reference for info on the earlier Boss models.

Also: first person to get a gold painted 1998 limited edition DS-1 wins.
